DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Specifically, it is unclear exactly what a "respective size of said bottom portion" entails. Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

 - an inside wall and an outside wall extending upwardly from respective size of said bottom portion(Fig.'s 1 & 11);
 - an end wall extending upwardly from an end offset bottom(Fig.'s 1 & 11);

Art Unit: 3727

- a plurality of longitudinally spaced ribs formed transversely across adjoining portions of the bottom portion and the inside wall and the outside wall each set rib forming a shaped inner indentation on inner surfaces of the inside wall, the outside wall and the bottom portion and similarly shaped protrusions on outside surfaces of the inside wall the bottom portion and the outside(Fig.'s 1 & 11); and a second tray unit including:
 - an elongated bottom portion(Fig.'s 1 & 11);
 - an inside wall and an outside wall extending upwardly from respective sides of said bottom portion(Fig.'s 1 & 11);
 - an end wall extending upwardly from an end portion of said bottom portion(Fig.'s 1 & 11);
 - a plurality of longitudinally spaced ribs formed transversely across adjoining portions of the bottom portion and the inside wall and the outside wall, each said rib forming an inner shaped indentation on inner surfaces of the inside wall, the bottom portion and the outside wall and similarly shaped protrusions on outside surfaces of the inside wall, the bottom portion and the outside wall(Fig.'s 1 & 11);
 - wherein the protrusions of the first tray unit are shaped to fit within the indentations of the second tray unit(Fig.'s 1 & 11).
